

DAVID ZHAO HAN

Sembawang, Singapore

davidzhaohan@gmail.com • Mobile phone: 89298939

Singaporean software developer passionate about software engineering

WORK EXPERIENCE

MAY 2022 – MAY 2025

SOFTWARE ENGINEER, MONEYTHOR

- Full-stack software development on Moneythor's core product which is a personal finance platform web application hosted on-premise in banks.
- Worked on updates on backend and frontend APIs. I made the backend API to be able to accommodate more data fields and the frontend API being able to query user transactions on more angles.
- Updated and fixed bugs in build script to make the compiling and building of the web application faster and more reliable.
- **Technologies used:** Java, Spring boot, Javascript, HTML, CSS KnockoutJS, Thymeleaf, JPA, PostgreSQL

MAY 2020 – MAY 2022

SENIOR ENGINEER, ST ENGINEERING

- **CI/CD:** Created Jenkins builds to automate testing of applications. This improved the efficiency of the QA team by at least 50%.
- **Software development:** Created helper applications such as an API platform for management portal, a downloader to automatically fetch update packages for dependent software
- **Software maintenance:** Involved in troubleshooting and investigation of software issues
- **Research:** Assessed the feasibility of using a branded GPU for transcoding video stream and files and created proof-of-concept test cases

MAY 2018 – FEB 2020

APPLICATION ENGINEER, RAKUTEN INC. JAPAN

Experience with large-scale enterprise infrastructure and software and was involved in

- **software migration:** from old technologies that lack documentation to modern technologies with full documentation. I was involved in migrating an internal admin app (Ceasar framework + Struts to Spring boot + JSP) and batch programs (Perl to Python).
- **software maintenance:** troubleshooting and regular updates/patches on two public facing apps (one in Spring boot and one in Laravel). I used bash commands and scripts extensively to work on CentOS servers. I used JIRA for issue tracking/reporting. I also used MySQL for manual operation on databases for maintenance purposes.
- **software development:** using event-driven asynchronous node.js as backend and HTML, CSS, javascript as frontend, CI/CD using Jenkins and CircleCI, documentation and knowledge sharing

using Confluence.

MAY 2017 – APR 2018

APPLICATION SPECIALIST, ACTIVATE INTERACTIVE PTE LTD

I was involved in developing and maintaining mobile apps written in Titanium and React Native frameworks. I developed the heart rate measurement feature on Healthy 365 mobile app and an admin app for user registration. I also maintained another admin app developed for event organizers.

MAY 2016 – AUG 2016

TECH INTERN, V-KEY PTE LTD

Worked with another intern on building a product demo app for the company that showcases how its SDK secures sensitive data transactions. I was involved in backend components:

- web app (developed using Spring framework)
- database management (MySQL)
- admin console UI (JSP)

TECHNICAL SKILLS

FRAMEWORKS

- Spring Framework
- JUnit

BACKEND

- Java
- Python
- MySql
- Node.js
- Bash

CI/CD

- Jenkins
- CircleCI
- Sonarqube

FRONTEND

- Javascript
- HTML5
- React.js
- CSS and Bootstrap

CERTIFICATIONS AND COURSES

- Containers for Deploying and Scaling Apps course by NUS ISS
- Japanese Language Proficiency Test level N1 (Japanese language certification for foreigners)
- Fundamental Information Technology Engineer Examination (national certification in Japan conducted in Japanese)

EDUCATION

AUG 2013 - MAY 2017

Bachelor's degree in computer science with honours

National University of Singapore

Took classes in diverse areas of computer science

- Software engineering
- Algorithms
- Computer graphics
- Computer networks
- Computer security

JUL 2015 – JAN 2016

Student exchange programme

University of Queensland, Australia

Expanded my academic perspective by taking classes outside computer science

HUMAN LANGUAGE SKILLS

- English native level
- Mandarin native level
- Japanese native level
